

PURESAFE™

Manufacturing & Research Corp.

PureSafe Gold Seal Program Certification:

Water Quality Association (WQA) certifies products to industry standards. WQA is accredited by the American National Standards Institute (ANSI) and the Standards Council of Canada (SCC) and certifies products to NSF/ANSI 60, 61, 14, 50, 42, 44, 53, 55, 58, 62, 177, 222, 51, and 24 standards. WQA issued the first Gold Seal in 1959 representing product integrity and performance. Manufacturers and consumers can be assured that products bearing the Gold Seal, meet or exceed industry standards (WQA, NSF/ANSI, IAPMO, ASME, ASTM, EPA's WaterSense, etc.) for material safety, structural integrity, performance in removing a variety of drinking water contaminants, and facility inspections. The PureSafe™ management team felt the Gold Seal Certification was an effective way to differentiate our product in today's marketplace.

NSF/ANSI-61 International Standard for Drinking Water Additives

NSF/ANSI-61 Drinking Water System Components - Health Effects

This Standard establishes minimum health effects requirements for the chemical contaminants and impurities that are indirectly imparted to drinking water from products, components, and materials used in drinking water systems. This Standard does not establish performance, taste and odor, or microbial growth support requirements for drinking water systems products, components, or materials. Drinking Water Treatment Products certified to NSF/ANSI 61 have not been tested or evaluated for contaminant reduction performance. Contaminant reduction testing and certification claims shall be evaluated via the industry's residential drinking water treatment standards.

Product Type: Mobile Water Treatment Device

Brand Name: PureSafe Mobile Water Purification System

Model: FRWS

Water Contact Temp: CLD

Water Contact Material: Various

Size: N/A

WQA ORD0902 - Evaluation of Lead Content in Drinking Water Products, Materials, and Components

The Other Recognized Document (ORD), ORD0902, was established by WQA to compile the minimum requirements for the evaluation of lead content in drinking water products, material, and components for compliance to laws, regulations, or other restrictions for lead content. ORD0902 combines the lead content calculations from NSF/ANSI 61 - Annex G and the testing protocol established by the California Department of Toxic Substances. Certification to ORD0902 demonstrates compliance to the following: • California Health and Safety Code Section 116875 definition of "lead free" (A.K.A. NSF/ANSI 61 - Annex G, AB 1953), and • Vermont's lead in consumer products law, 9 V.S.A., Chapter 63, Subchapter 1C, and • Any other law, regulation, or restriction on lead content that may use the same calculations and testing protocol to demonstrate "lead free" compliance.

Product Type: Mobile Water Treatment Device
